To whom it may concern,

My name is Ivory Bostic, and I am writing you regarding your recent job posting. The opportunity presented in this listing is highly intriguing and I believe my strong technical background in JavaScript, Photography, and Broadcast Operations will make me a very competitive candidate for this position.

I am a self-taught JavaScript coder. I have dabbled in writing code throughout my teenage years when Myspace and Neopets were still popular. I never imagined that a hobby could become such a viable skill. When I began studying Computer Graphics in college it further sparked my interest in writing code. I began to build websites and studying the latest frameworks and libraries like React.js, Material-UI, and Bootstrap. I soon discovered how to build the backend with Express, Node.js, and PostgreSQL. Most recently, I briefly attended a coding bootcamp at Eleven Fifty Academy where I gained my first JavaScript certification. The school allowed me to sharpen my skills and introduced me to new concepts such as Agile Methodologies.

I eventually started a very successful photography studio in downtown, Indianapolis. I focused on high-end retouching and photoshop manipulation with the use of Adobe Photoshop, Lightroom, Bridge, and even Premier Pro. Running a lucrative business led me to gain Social Media Marketing and SEO skills.

While I studied in school, and ran my business, I also held a few different hats in media and office administration. At my most recent position my job was focused on sales tax, excel spreadsheets, and processing credit applications. Prior to that I worked in the media industry scheduling television shows and commercials for major networks like Fox 59 and Wish TV.

I still consider myself a junior level coder, however, I can quickly adapt to new technology and practices. In college I had to dabble in 3D imaging software like Maya, in media I mastered broadcasting software such as Wide Orbit, and now I am on the journey of mastering the art of code. I am confident that my skill set will allow me to master any technique your company might set before me. I look forward to speaking with you regarding the position. I appreciate your consideration.

Sincerely,

Ivory Bostic
